All-in-one Automated Rewind System

Features:

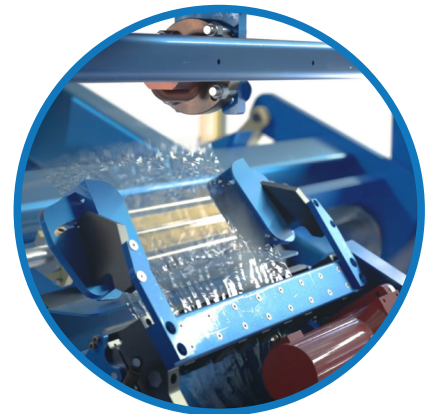

- Cable is transported automatically from the pay-off end to the take-up end once inserted into the cable transporter. Operator no longer has to manually pull the cable from one machine to the other. This feature improves overall processing time, reducing operator fatigue, producing more, while improving profitability.
- Cable is transported through a spark tester to validate cable integrity.
- Once the rewind operation is complete the machine automatically cuts the wire.
- Tail of wire must be manually secured.

Options:

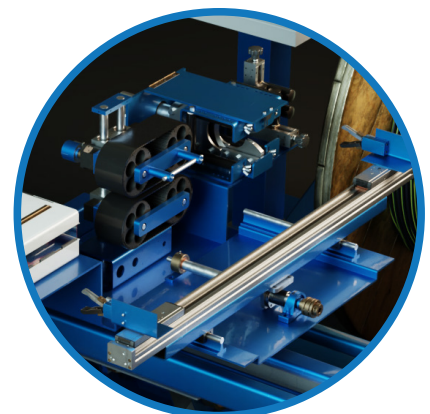

- Up to 12,000 lb pay-off capacity
- Automated reel ejection
- Automatic film wrap
- Automatic labeling
- System to automate tail stapling
- Safety fencing system
