

AUTOMATED SPOOLING MACHINES

Fine Wire In-Line Low Tension, High Speed Re-Spooling

In-line Automated Spooling Machines
for low tension, high speed re-spooling
of welding, soldering and fine wires.

AUTOMATED SPOOLING MACHINES

Fine Wire In-Line Low Tension, High Speed Re-Spooling

Features:

- Manual Shaftless ILRSP Powered Payoff hydraulically lifts wire from shop floor.
- Accumulator Dancer Speed Control to synchronize the payoff with the take-up spooler.
- Counter weight tension control.
- ILHSS High Speed Spooling take up machine.
- Automatic Traversing Spool Levelwind with electronic adjustable pitch.
- IDEC PLC Programmable measuring system with HMI to accurately measure and automatically slowdown and stop the footage to length.
- Plug-in shaft feature for fast and easy spool shaft change out.

*Plug-In Spool Shaft's
or Collapsible Coilers*

*Counter Weight
Tension Control*

Manual Shaftless Feature
