

CATERPULLER COMBOS

Custom-Made Material Pullers

Ideal for pulling material from Pay-out equipment, or for in-process applications such as extruders, drawing lines, stranding lines, printers and automatic cut-to-length braiders. "Caterpullers" and Capstans both standard and custom, are available to operate with other Reel Power equipment and/or existing process lines. Based upon material type and size, as well as line speed and line pull requirements. We will provide a system to meet your precise specifications.
