

# CONDUIT CART

## Mobile Conduit Cart

Designed to work in narrow aisles which are too narrow for a forklift to operate. It is the best solution when order filling. Two side swivel phenolic casters, front and rear fixed casters provide enhanced maneuverability. Since wide aisles are not required, the Conduit Cart allows for more complete usage of available storage space.

### ***Conduit Cart Specifications:***

60" long x 32" wide x 39" tall

3,000 lb capacity

Steel square tubing on base platform for more rigidity and longer lasting durability.

Phenolic rigid and swivel casters for longer wheel life and a smoother ride. No more chipping wheels.

**Steel Square Tubing**

**Phenolic Casters**  
*\*Optional Steel Wheels*

# TIP-UP CART

## Portable Pay-Out Carts

**Reel Capacity: 48" dia. x 32" wide x 2,000 lbs.**

- Portable pay-out stands have five (5) reel loading positions for various sized pay-out reels.
- The operator uses his/her body weight as leverage to lift the reel into position.
- Replaceable bolt on axle brackets. No more cutting and welding to replace worn brackets.

1. The operator inserts an axle onto the reel with the proper reel adapter bushing.
2. Tilt the cart onto the wheels and maneuver the unit forward into the reel until the reel axle is aligned with the proper loading position.
3. The operator places his/her foot on the lower/back cross-member, grasps the upper/back cross-member and pulls back.

**Steel Wheels**

**Replaceable  
Axle Brackets**
